Massachusetts Interactive Property Map

The screenshot shows the MassGIS Massachusetts Interactive Property Map interface. On the left, there is a sidebar with a 'Details' tab and a 'To access parcel information:' section. This section includes instructions: 'Enter an address or zoom in by using the +/- tools or your mouse scroll wheel. Parcels will draw when zoomed in.' and 'Click on a parcel to display a popup with information about that parcel.' Below this is a 'Complete Help (PDF)' link and a 'Parcel Legend' section. The legend shows three map styles: 'Full address: largest scale', 'House numbers: medium scales', and 'Outlines only at smallest scales'. At the bottom of the sidebar is an 'About this Viewer' section. The main map area shows a map of Massachusetts with major cities and highways labeled. A red box highlights the navigation controls (plus, home, minus buttons) on the left. Another red box highlights the 'Basemap' dropdown and the search bar on the top right. A third red box highlights the 'Measure' button on the top right. A fourth red box highlights the 'Measure Distance and Area' text. A note box at the bottom center states: 'Note: When you first open the map, you will not see the parcel data. Parcels will appear when zoomed in to closer scales.' A scale bar at the bottom left indicates 0, 10, and 20 miles. The MassGIS logo is in the bottom right corner.

To access parcel information:

- Enter an address or zoom in by using the +/- tools or your mouse scroll wheel. Parcels will draw when zoomed in.
- Click on a parcel to display a popup with information about that parcel.

Click the "Basemap" button to display background aerial imagery.

About this Viewer

The map displays land property boundaries from assessor parcel maps across Massachusetts. Parcel information is from local assessor databases. Boston's data are served by the city; all other data are from MassGIS' standardized "Level 3" parcels. [More details ...](#)

Note: When you first open the map, you will not see the parcel data. Parcels will appear when zoomed in to closer scales.

Details for each tool are provided on the following pages

Enter Address

► Enter an address in the text box.
The “type ahead” feature will fill in the location.

► When the address you want appears in the list, click on it.

The map will zoom to the approximate location, indicated by a small popup.

Using the MassGIS Massachusetts Interactive Property Map

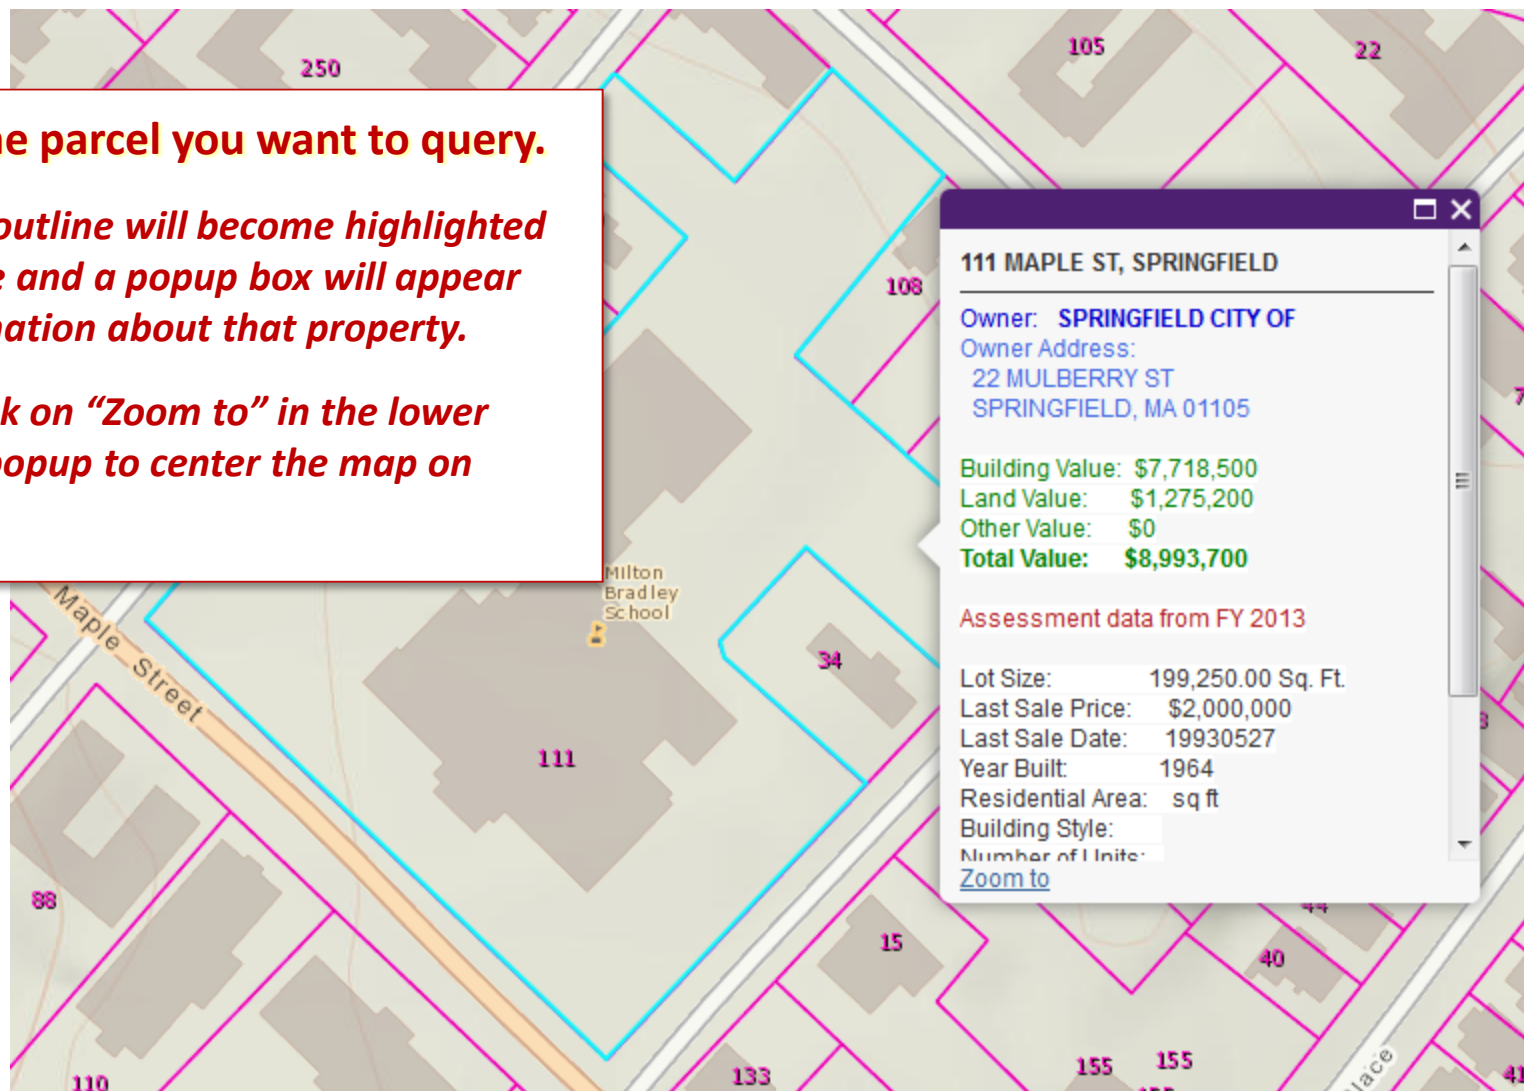

3

Enter Address

► Click on the parcel you want to query.

The parcel outline will become highlighted in light blue and a popup box will appear with information about that property.

You can click on "Zoom to" in the lower left of the popup to center the map on that parcel.

Enter Address

For condominiums, many records may be associated with a single parcel.

Indicates the record you are viewing and the total number associated with the selected parcel.

(2 of 12)

409 UN 9 POND ST, BRAINTREE 02184

Owner: **US ALLIANCE FED CREDIT UNION**
Owner Address:
18 COMMERCE WY STE 7100
WOBURN, MA 01801

Building Value: \$174,900
Land Value: \$0
Other Value: \$0
Total Value: **\$174,900**

Assessment data from FY 2013

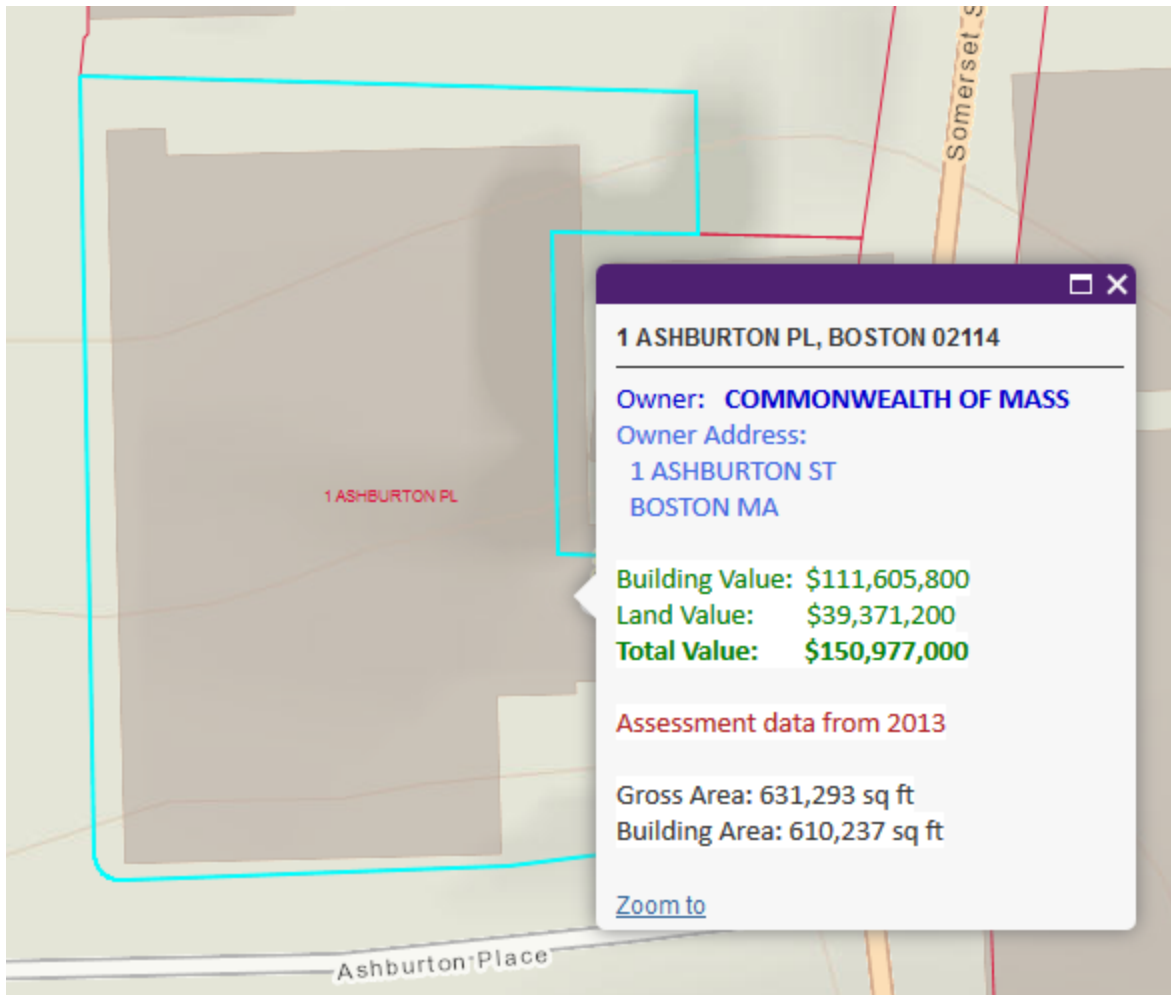

Lot Size: 0.00 Acres
Last Sale Price: \$142,700
Last Sale Date: 20110503

Using the MassGIS Massachusetts Interactive Property Map

5

Enter Address

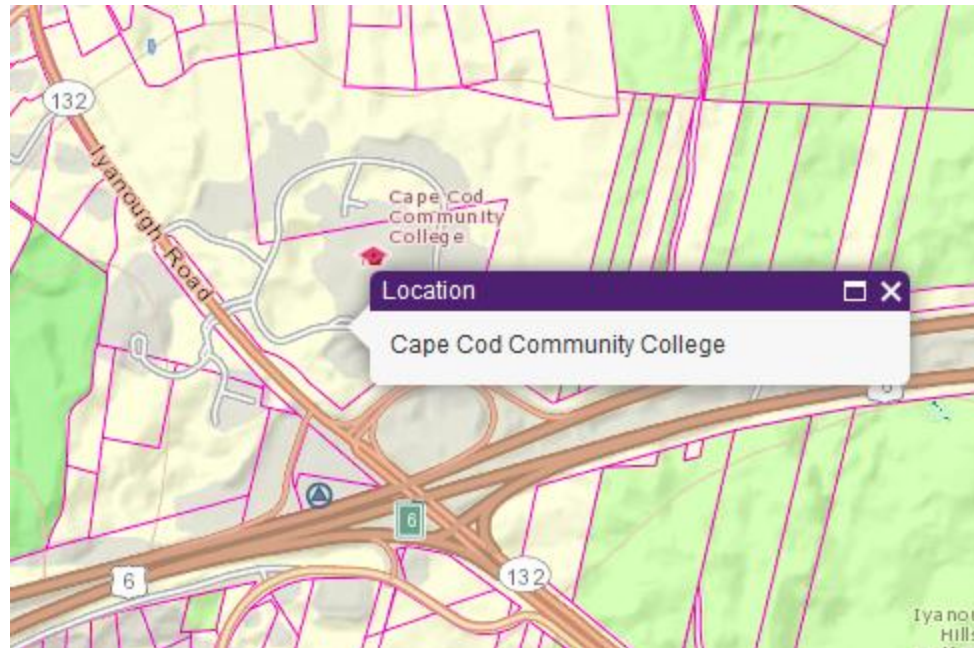

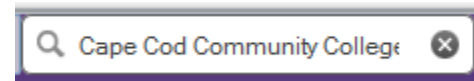

Note: For parcels in Boston, more limited information will appear in the popup.

The data from Boston are being served by the city and currently do not conform to MassGIS' "Level 3" parcel standard. Some parcels may not contain property and land values.

Also, the parcel outlines for Boston are drawn in red; parcel outlines in all other communities are drawn in pink.

Enter Address

- ▶ You can also enter a place name to zoom to its approximate location.

Navigation

► Click these buttons to:

Zoom In

Return to the statewide extent

Zoom Out

► You can also use your mouse scroll wheel to zoom in and out.

► To pan, click on the map and drag it to the desired location.

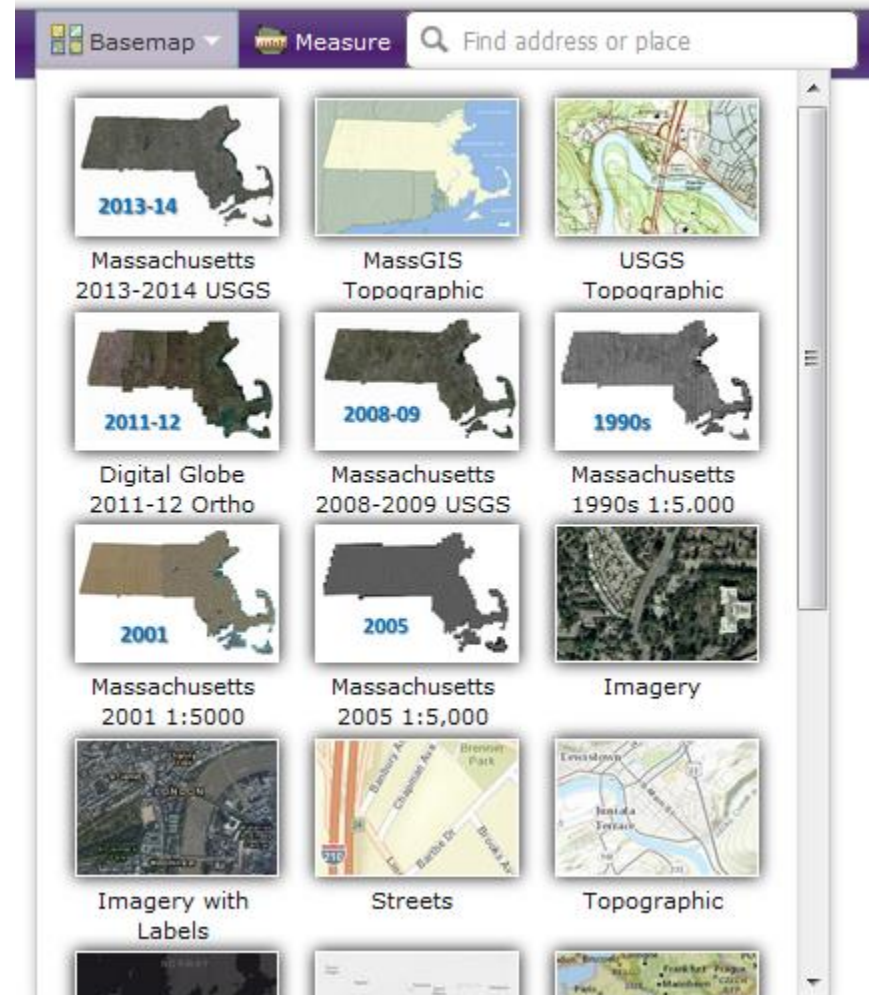

Switch Background

- Click the “Basemap” button to choose a different background.

Aerial photography is available from several years.

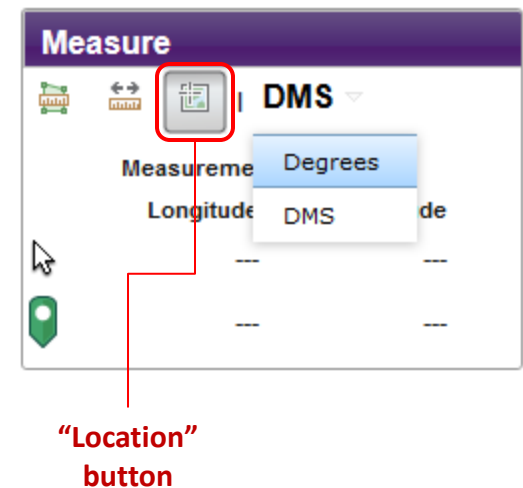

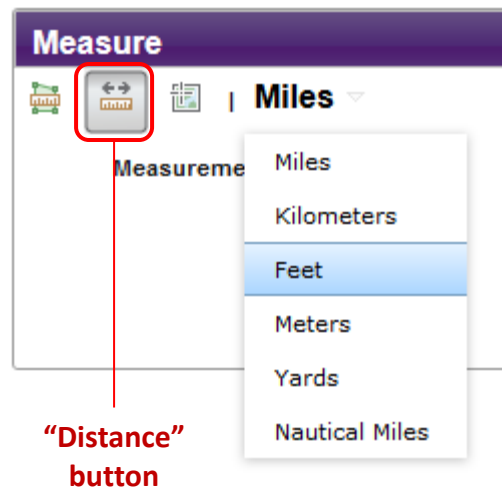

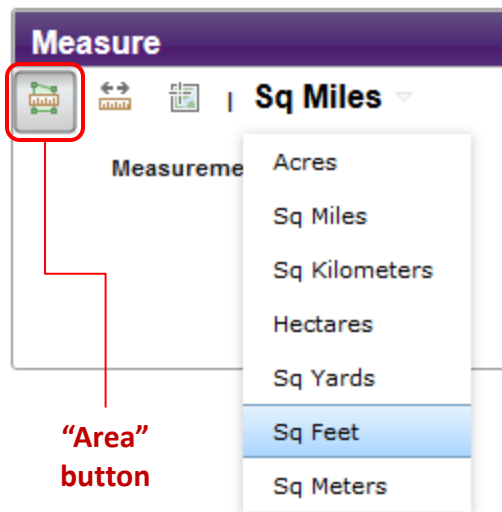

Example of the 2013 imagery as the background

Measure Distance and Area

- Click the “Measure” button to open a window with tools to measure distances and areas on the map.

- Click the units (“Sq Miles”, “Miles” and “DMS” are the defaults).
- Choose the units you want from the list that appears.

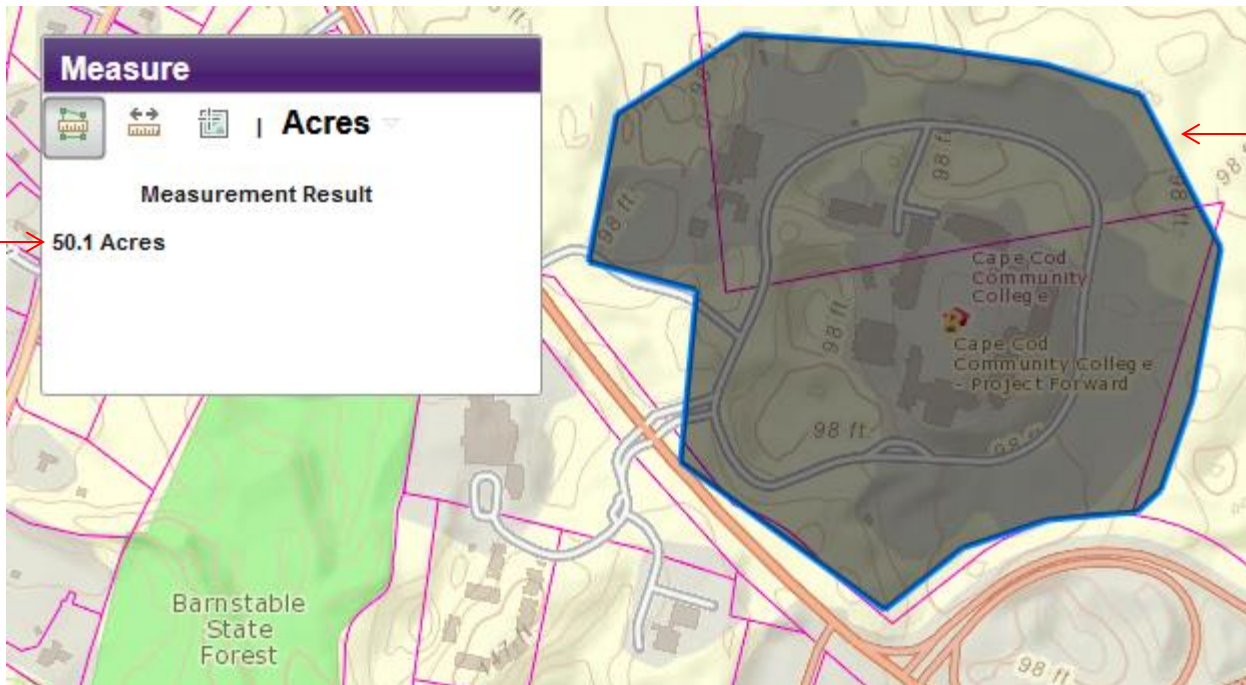

Click the “Measure” button again to dismiss the tools.

Measure Distance and Area

- ▶ For Area, click on the map to draw a shape.
- ▶ Double-click to finish.

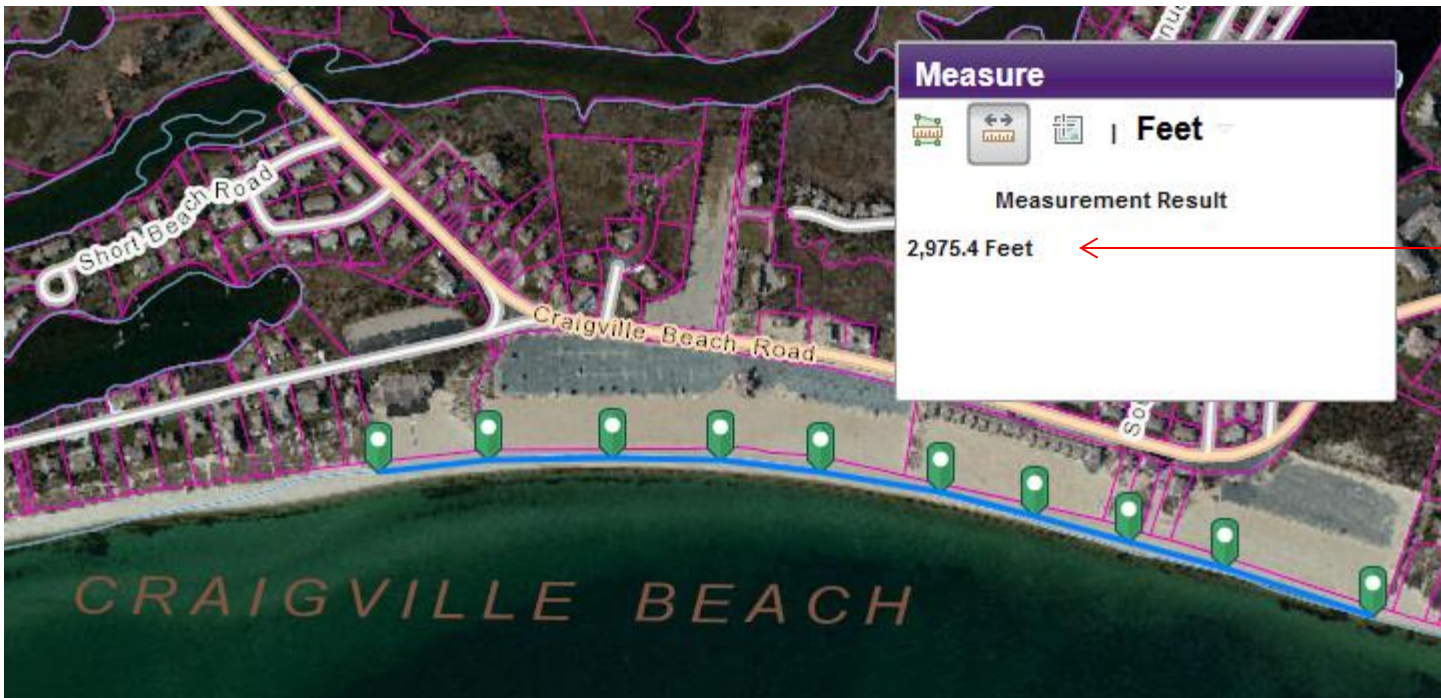

The shape will appear with a blue outline and a semi-transparent gray fill.

The area of that shape will be listed in the Measure box in the units you chose.

Measure Distance and Area

- ▶ **For Distance, click on the map to draw a blue line.**
With each click, a green marker symbol will appear.
- ▶ **Double-click to finish.**
The total distance of the line will be listed in the Measure box in the units you chose.

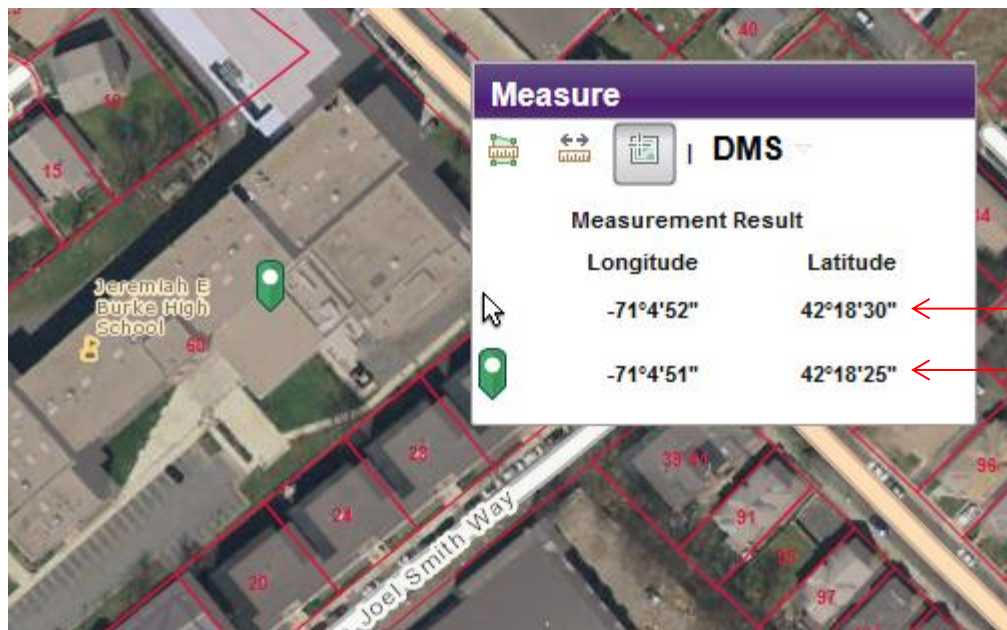

Measure Distance and Area

- For Location, click on the map to find its longitude and latitude in Decimal Degrees or Degrees/Minutes/Seconds.

A green marker symbol will appear where you clicked and its coordinates will be listed in the Measure box in the units you chose.

The coordinates listed next to the white arrow are those at the current position of your mouse pointer.
